

Call for Papers to “The 21st TRIZ Symposium in Japan, 2025”

February 21, 2025

Japan TRIZ Society, NPO

Executive Committee of the 21st TRIZ Symposium in Japan

For the purpose of open presentations, discussions and exchanges on the creativity & innovation methodology “TRIZ” and related topics, the NPO Japan TRIZ Society will hold “The 21st TRIZ Symposium in Japan, 2025”.

Date: September 4th (Thursday) through 5th (Friday), 2025 (2days)

Location: Waseda University (Nishi-Waseda Campus) , Tokyo, Japan

Theme: “_Leap into a new future with TRIZ! ”

TRIZ (Theory of Inventive Problem Solving) is a philosophy, technique and knowledge engineering tool that strongly supports not only technological innovation in industry, but also software and business model innovation, and has been introduced and studied in many application cases by users in Japan and abroad. The use of TRIZ methods opens up a variety of possibilities. And from there, you can open up a brilliant future and realise your dreams.

The Japan TRIZ Symposium has been held 21 times this year and many findings have been introduced and applied.

In addition to these, we are convinced that by presenting and discussing the results of your TRIZ studies and research, you will obtain many more useful hints, which will be beneficial to your work in the future. We also hope that by presenting your work and research at this conference, you will be able to make your connections with many people even stronger.

In this way, we hope that you will bring together your wisdom and knowledge in order to further develop your work and research.

We encourage you to apply actively.
